2. Department of General Surgery, "Colțea" Clinical Hospital, Bucharest, Romania

Deadline for manuscript submissions:
closed (15 February 2024)

Message from the Guest Editors

Cancer is the leading cause of death worldwide, accounting for more than 10 million deaths each year and even a larger number of patients that are diagnosed with this disease and have to undergo various procedures. Our goal as medical practitioners or as scientists is to obtain the best outcome for our patients, from prophylactic procedures to a correct diagnosis, a specific multimodal treatment, and a rigorous follow-up. All these have significantly improved in recent years because of a better understanding of the genetic and molecular mechanisms of cancer development, the emergence of new technologies in cancer detection or surgical techniques, and also breakthroughs in oncological therapies.

The aim of this Special Issue is to obtain new insights into advances in the cancer multimodal approach; therefore, we encourage authors to submit their systematic reviews, meta-analyses, clinical outcome studies or new surgical techniques and oncological therapies regarding this subject.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.
Journal Rank: CiteScore - Q2 (*General Medicine*)
