Message from the Guest Editor

Dear Colleagues,

In endodontics, the removal of bacterial load from the complex endodontic space is essential to achieving success, which is gained through shaping, 3D cleaning, and the tridimensional obturation of the complex root canal system. In recent years, satisfactory results could be obtained with modern technologies such as an operative microscope, ultrasonic tips, modern rotary files, devices to activate irrigation, and tridimensional obturation techniques. Restorative dentistry is evolving rapidly thanks to new materials and modern adhesive systems that allow new therapeutic approaches guaranteeing the aesthetic-functional rehabilitation of the compromised tooth.

This Special Issue focuses on all the technologies available today to increase the success rate in Endodontics and restorative dentistry.

Dr. Alfredo Iandolo

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
