State of the Art in Spinal Deformity Surgery

Guest Editors:

Prof. Dr. Yoshihisa Kotani

Department of Orthopaedic Surgery, Kansai Medical University Medical Center, Osaka, Japan

Prof. Dr. Jun Takahashi

Department of Orthopaedic Surgery, Shinshu University School of Medicine, Asahi 3-1-1, Matsumoto 390-8621, Nagano, Japan

Deadline for manuscript submissions:

15 August 2024

Message from the Guest Editors

Spinal deformity surgery has evolved dramatically in recent decades. In addition to pediatric deformities, a trend of increasing deformities thoraco-lumbar adult in degenerative scoliosis and cervical kyphosis has been noted Thoraco-lumbar deformities often involve severe lower back pain and quality of life disturbance, resisting against conservative treatment. Several studies suggest that surgical treatment effectively improves the patients' quality of life. Although traditional posterior surgeries with osteotomies were highly invasive, the most recent minimally invasive approach has been reported to effectively decrease surgical complications. However, there are still controversies that exist in terms of the complexity of surgical procedures and limitations regarding deformity correction. This Special Issue focuses on the recent progress of spinal deformity surgery in terms of innovative techniques, instruments, materials, and related emerging technologies.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed,

MEDLINE, PMC, and other databases.

Journal Rank: CiteScore - Q2 (General Medicine)
