Dr. Mario Ganau

Department of Neurosurgery, Oxford University Hospitals NHS Foundation, Oxford OX3 9DU, UK

Deadline for manuscript submissions:

closed (30 April 2024)

Message from the Guest Editors

The burden of traumatic brain injury (TBI) is on the rise anywhere. However, the mechanisms of injury involved, as well as the severity and long-term consequences of TBI, might vary remarkably across countries. Chronic traumatic encephalopathy (CTE) is a pathological conditions that has garnered increased attention in recent years, particularly in the context of sports-related TBI.

In fact, mild TBI/concussion injuries and CTE are currently the subject of intense research and public concern due to their incidence among world-renowned professional athletes. This has put the potential long-term consequences of repeated head injuries under the spotlight.

The primary goal of this Special Issue is to offer a forum for research into the early monitoring, pathophysiology and prognostication of TBI. As such, we invite the submission of papers that delve deeper into the distinct features, causes, symptoms and outcomes of TBI and CTE. Understanding these conditions is crucial for both the medical/scientific community and the public in terms of enabling preventive measures and offering improved care for individuals at risk of or affected by these injuries.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed,

MEDLINE, PMC, and other databases.

Journal Rank: CiteScore - Q2 (General Medicine)
