Message from the Guest Editor

Dear Colleagues,

The severe acute respiratory syndrome caused by this infection (SARS-CoV-2) also affects patients with cardiovascular and thoracic surgical pathology, sometimes worsening their prognosis in the short and immediate term.

It has become clear that patients with cardiovascular and thoracic pathology should not be operated on for the duration of the infection and the course of COVID pneumonia.

However, there are situations when these operations cannot be avoided.

It is proven that inflammation, endothelial dysfunction, hypercoagulation and the tendency to intravascular thrombosis obscure the prognosis of these patients.

Given the clinical significance of this topic and its impact on clinical practice and public health, Medicina is launching a Special Issue entitled "Advances in Cardiothoracic and Vascular Surgery in the COVID-19 Era" with the aim of delivering new insight into the impact of the COVID-19 pandemic on cardiovascular management and outcomes for patients with underlying cardiovascular disease.

Prof. Dr. Edgaras Stankevičius Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed,

MEDLINE, PMC, and other databases.

Journal Rank: CiteScore - Q2 (General Medicine)
