Deadline for manuscript submissions:

closed (29 February 2024)

Message from the Guest Editors

Dear Colleagues,

This collection aims to explore the predictive value of functional, neuropsychological, motor, neuropsychiatric markers regarding the development of cognitive impairment and dementia (Alzheimer's and non-Alzheimer's). The individual or combined value of these markers in revealing individuals at high risk of developing cognitive impairment, separating rapid from regular and slow decliners, predicting the onset of different dementia entities. accompanying or preluding neuropathological alterations, or indicating potential protective properties against cognitive impairment will be explored. In parallel, the modifying effects environmental (dietary, socioeconomic, and so on), medical, or genetic factors will be investigated.

Any types of manuscripts supported by the journal, including original research articles, brief research articles, community case studies, narrative reviews, mini-reviews, systematic reviews, and meta-analyses, pertaining to these topics are welcome.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed,

MEDLINE, PMC, and other databases.

Journal Rank: CiteScore - Q2 (General Medicine)
