Message from the Guest Editors

Dear Colleagues,

The history of general thoracic surgery is always present and influences our way of thinking, decision-making, and innovation. Video-assisted and robotic chest surgery, which rely on artificial intelligence-supported imaging, are based on a 150-year evolution in thoracic surgery. Progressive ideas, heated debates over new concepts, the construction and deconstruction of dogmas, obstacles, controversies, and even misconceptions are paving the way to where we are now. This rich heritage commands our attention and is in constant need of care. The 2023 Mons meeting of the Royal Belgian Society of Surgeons offered a unique opportunity to reflect on the history of thoracic surgery in various parts of the globe, as well as our art. The picture is admittedly incomplete, but it strives to be as honest as possible while avoiding selection bias.

medicina

an Open Access Journal by MDPI

Editor-in-Chief

Medical Academy, Lithuanian
University of Health Sciences,
Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
