Message from the Guest Editor

Dear Colleagues,

The emergence of multidrug-resistant organism (MDRO) infection creates challenges for physicians. The current literature cannot give solid evidence to support the standard therapy of MDRO infections. Currently available antimicrobial treatment options are often limited, ineffective, and associated with many adverse effects. In the real world, physicians may use some alternative treatments according to some in vitro data or personal experiences, and many scientists have developed antibiotic alternative therapy against MDRO, such as bacteriophage, probiotics, antimicrobial peptides, and herbs. We welcome all kinds of study (including in vitro data, animal model, clinical series) about alternative therapy, including antibiotic and non-antibiotic strategy for MDRO infections.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
