Department of Medical, Surgical and Advanced Technologies "G.F. Ingrassia", University of Catania, Catania, Italy

Deadline for manuscript submissions:

closed (31 December 2021)

## **Message from the Guest Editor**

Challenges and problems in forensic sciences are as old as human interaction and as new as the information age. Given the importance of the topic, the journal *Medicina* is launching a Special Issue entitled "Update in Forensic Sciences" with the aim of gathering accurate and up-todate scientific information on all aspects of this theme. Particularly, this Special Issue aims to get an overview of recent technological advances in all fields of the forensic sciences, both new technology and new applications of existing technology, illustrating with examples of how these innovations impact the practice and the role of forensic pathologists about death investigation. At the same time, this Special Issue aims to analyze the unsolved questions in every field of forensic pathology. The ultimate purpose of this Special Issue is to obtain review articles that provide a comprehensive overview of the recent advances in all areas of forensic pathology.
