

A Commemorative Special Issue in Honor of Professor Simon Judd

Guest Editors:

Dr. Gaetano Di Bella

Department of Engineering and
Architecture, Università degli
Studi di Enna "Kore", 94100 Enna,
Italy

Dr. Riccardo Campo

Department of Civil and
Environmental Engineering–
(DICEA), University of Florence,
50139 Florence, Italy

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

Dear Colleagues,

Simon Judd is an Emeritus Professor at Cranfield University, where he has worked for 29 years, and spent six years on sabbatical as a Chair in Environmental Engineering at Qatar University. He has been an independent environmental consultant since 2012 as Director of Judd & Judd Ltd., the company which owns the [TheMBRSite.com](https://www.TheMBRSite.com) and [SludgeProcessing.com](https://www.SludgeProcessing.com) websites.

He has spent most of his professional career managing applied research projects, predominantly in membrane technology for water and wastewater treatment and encompassing key topics such as sludge quality, process cost, pre-treatment and post-treatment, resource recovery (including water reuse) and process upset phenomena. He has (co-)authored 215 papers and six book titles, including both editions of '*The MBR Book*'. He has supervised a number of large research projects, including 36 research student programmes, 24 of which at a doctorate level.

This Special Issue is aimed at reflecting on practical studies related to membrane and MBR technology. Studies carried out at or associated with full-scale plant operation are particularly encouraged.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Spas D. Kolev

School of Chemistry, The
University of Melbourne,
Melbourne, VIC 3010, Australia

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Polymer Science*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
