

Membranes: 10th Anniversary

Guest Editors:

Prof. Dr. Spas D. Kolev

Prof. Dr. Shiro Suetsugu

Prof. Dr. Giulio C. Sarti

Prof. Dr. Benjamin S. Hsiao

Prof. Dr. Wojciech Kujawski

Dr. Clàudia Fontàs

Deadline for manuscript
submissions:
closed (31 October 2020)

Message from the Guest Editors

Membranes (ISSN 2077-0375) is an international, peer-reviewed, open-access journal that covers all aspects of membrane technology, including the preparation and characterization of membranes and their applications in water treatment, gas separation, energy sustainability, food technology, biotechnology, and pharmaceutical industries.

This year, *Membranes* will celebrate its tenth anniversary. Since its inaugural issue in 2011, it has published a great number of high-quality and high-impact articles, and consequently has established itself as one of the leading membrane science journals. This is reflected by its CiteScore (Scopus) of 3.28 and the fact that it is in the process of acquiring its first Impact Factor (Clarivate Analytics) later this year.

With great pleasure and pride, we would like to announce the publication of a Special 10th Anniversary Issue of *Membranes* to mark this important milestone in its development, and would like to invite the submission of original articles, short communications, and critical reviews in all areas of membrane research covered by the journal

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Polymer Science*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
