

New Advancements and Challenges in Clinical Metabolomics for Inborn Errors of Metabolism and Rare Diseases

Guest Editors:

Dr. Adam D. Kennedy

Metabolon, Inc., Morrisville, NC,
USA

Prof. Dr. Sarah H. Elsea

Molecular and Human Genetics,
Baylor College of Medicine,
Houston, TX, USA

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editors

The Special Issue of *Metabolites* entitled “New Challenges in Clinical Metabolomics for Inborn Errors of Metabolism and Rare Diseases” will be dedicated to identifying and addressing the most current challenges in the field of diagnosing and treating rare diseases. In addition to clinical studies, basic research including animal models and cell culture studies will also be included to provide a robust picture of the latest results in the field. New bioinformatics approaches for data analysis and tools to analyze large data sets are of interest and will be considered for this Special Issue.

2. Formerly Professor of Internal Medicine, School of Specialization of Allergy and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
