Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we aim to show the readers some of the advances in metabolic imaging and translational research in metabolism. State-of-the-art technologies and methodologies to monitor metabolic disorders are currently available. However, significant challenges still lie in the accurate detection of metabolites in vivo and the lack of cross-validating applications. Thus, we intend to show recent advances in the field of metabolic imaging including applications in the fundamental sciences and examples of translational research in metabolism. We also invite the scientific community to discuss new challenges and innovations in metabolic analysis, metabolomics, metabolic probe development and current open-source software.

Dr. André Martins

Dr. Myriam M. Chaumeil

Guest Editor

an Open Access Journal by MDPI

2. Formerly Professor of Internal Medicine, School of Specialization of Allergy and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
