College of Life Sciences, Wuhan
University, Wuhan 430072, China

Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editor

Though metabolic processes play essential roles in the development and physiological/pathological function of skin, the underlying mechanisms are complex and are not yet well understood. This Special Issue of metabolites aims to explore cutting-edge research related to metabolism and skin disorders. We welcome articles pertaining to the following topics:

- metabolic syndrome and skin disorders;
- metabolic pathways and skin functions;
- metabolism in skin tumors and related topics and specific skin disorders.

We believe that this will bring together current knowledge about metabolism in relation to skin disorders, and help pave the way for the development of new therapies aimed at restoring healthy skin.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergy and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
