Metallic Nanostructured Materials and Thin Films

Guest Editors:

Dr. Catalin Constantinescu

Laboratoire LP3/UMR CNRS 7341, Campus de Luminy, 13009 Marseille, France

Dr. Ahmed Al-Kattan

Laboratoire LP3/UMR CNRS 7341, Campus de Luminy, 13009 Marseille, France

Deadline for manuscript submissions:

20 October 2024

Message from the Guest Editors

Dear Colleagues,

Metallic materials play a vital role in the economic life of modern societies. The aim of this Special Issue is to cover all relevant aspects of the chemical and physical processes of the production, transformation and characterization of metallic materials in bulk, thin films, nanostructures and/or nanocomposites, as well as modeling aspects involving such structures.

Accordingly, this Special Issue welcomes original research and review manuscripts on the challenges and trends covering fundamental and experimental research, with a special focus on the design, synthesis, and characterization of any type of metallic material and/or alloys, and the study of their structure/property relationships.

We also welcome manuscripts on the development of new experimental concepts, from the transfer, chemical transformation, and high-resolution patterning of advanced thin films and nanomaterials to the design and fabrication of devices

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. mechanical behavior. phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Metallurgy & Metallurgical Engineering) / CiteScore - Q1 (Metals

and Alloys)
