Prof. Dr. Qilin Zhang

Prof. Dr. Yuanqing Wang

Prof. Dr. Hongbo Liu

Deadline for manuscript submissions: **20 July 2024**

Aluminum alloy has the advantages of having a light weight, high strength, low temperature resistance, good corrosion resistance, good modulability, high recyclability, and so on. It is widely used in a variety of engineering fields, especially in structures under special environments. As a new type of high-performance engineering structure material, aluminum alloy has a broad prospect in the aspects of multi-modal material performance characterization, diverse component and joint form research and development, and new structural system innovation.

The topics of this issue include the analysis, design, simulation, and practice of aluminum alloy structures and aluminum-based composite structures. Original papers of a high standard dealing with all aspects of aluminum alloy structure research including material properties under different temperature and stress conditions, various forms of components, connections, joints, and new structural system behaviors are considered for publication.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. mechanical behavior. phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases. **Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
