

## Material Modeling in Multiphysics Simulation

Guest Editors:

**Prof. Francesco De Bona**

University of Udine, Udine, Italy

**Prof. Dr. Jelena Srnec Novak**

Faculty of Engineering, University  
of Rijeka, Rijeka, Croatia

**Dr. Francesco Mocera**

Department of Mechanical and  
Aerospace Engineering,  
Politecnico di Torino, Corso Duca  
degli Abruzzi 24, 10129 Torino,  
Italy

Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### Message from the Guest Editors

Virtual prototyping techniques, generally based on numerical methods, are widely used in the design process of an industrial product. The Special Issue is aimed at investigating metallic material modeling techniques for virtual prototypes with emphasis on both the theoretical basis and the experimental identification and verification. Special attention is addressed to simulation issues in metal forming and other metal processing technologies, in cyclic plasticity and thermal fatigue, in MEMs operation and soldering, in thermo-electro-mechanical modeling of electric vehicles components such as batteries, electric motors, electronics.

The purpose of this Special Issue is to collect papers providing state-of-the-art knowledge on material modeling for multiphysics simulations. Researchers are encouraged to submit research as well as review papers on specific aspects of the proposed subject or also to describe applications in which the above-mentioned topics are applied to relevant engineering case studies.

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Hugo F. Lopez**

Department of Materials Science  
and Engineering, College of  
Engineering & Applied Science,  
University of Wisconsin-  
Milwaukee, 3200 N. Cramer  
Street, Milwaukee, WI 53211, USA

### **Prof. Dr. Yong Zhang**

Beijing Advanced Innovation  
Center of Materials Genome  
Engineering, State Key  
Laboratory for Advanced Metals  
and Materials, University of  
Science and Technology Beijing,  
30 Xueyuan Road, Beijing 100083,  
China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **Inspec**, **CAPLUS / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
