Message from the Guest Editor

Dear Colleagues,

Rolling and extrusion are the most widely used metal plastic processing methods with high production efficiency. In recent years, with the huge demand for new high-performance products with high strength, high toughness, high processing performance, high corrosion resistance, new metal material preparation, metal plastic deformation under complex conditions, fine grain rolling and extrusion forming, continuous casting and rolling theory, and microstructure and performance control, ultra-fast cooling and other technologies are developing rapidly, presenting a new trend of interdisciplinary integration of materials, metallurgy, machinery, control, and computers.

The Special Issue invites articles reporting the latest advanced research results, aiming to promote the innovation of metal rolling and extrusion technologies, the infiltration and emergence of many scientific branches, and generation of original and disruptive technologies. Manuscripts will be welcomed from both fundamental scientific researchers and authors belonging to industrial companies involved in the field.

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
