Advances in Understanding Metal Electrolysis Processes

Guest Editors:

Prof. Dr. Bernd Friedrich

IME Process Metallurgy and Metal Recycling Department, RWTH Aachen University, 52072 Aachen, Germany

Prof. Dr. Jovan N. Jovićević

Institute of Chemistry, Technology and Metallurgy, Department of Electrochemistry, University of Belgrade, Njegoševa 12, 110000 Belgrade, Serbia

Deadline for manuscript submissions:

closed (30 June 2022)

Message from the Guest Editors

Dear Colleagues,

The field of metal electrolysis is wide-ranging, from metals production and refinement to galvanic coatings. Even for commodity metals like Cu, Ni, Zn, Pb, Al, Mg many open questions and unresolved issues remain connected to the process, the electrochemical mechanisms and their impact on the efficiency and quality. More and more complex recycling alloys needed to be handled and are subjects of widespread research. Emphases on improvements in energy yields, environmental compatibility and technical feasibility will certainly result in interesting publications.

In this special issue, a further focus is placed on rare metals which as well as their alloys continue to be in high demand due to their ongoing and potential applications in advanced technologies like medical, electronics, and aerospace industries.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. mechanical behavior. phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Metallurgy & Metallurgical Engineering) / CiteScore - Q1 (Metals

and Alloys)
