

The Phage: Biology and Therapeutic Use

Guest Editors:

Prof. Dr. Richard James

School of Life Sciences,
University of Nottingham,
Nottingham, UK

Dr. David R. Harper

Evolution Biotechnologies,
Sharnbrook, UK

Deadline for manuscript
submissions:

15 December 2023

Message from the Guest Editors

This special edition of "*Microorganisms*", entitled "The Phage: Biology and Therapeutic Use" is intended to contain both reviews and original articles focussed on the emerging data in the field, and on supporting the viability of this approach in an area with real unmet need. With invited articles contributed by experts from around the world, it is intended to form a valuable resource for both workers in the field and curious newcomers to the sometimes abstruse field of bacteriophages, their biology, and the emerging potential for their therapeutic use.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
