Antimicrobial Resistance in Enterobacteriaceae and Enterococci

Guest Editor:

Message from the Guest Editor

Prof. Dr. Marcos De Donato Tecnologico de Monterrey, School of Engineering and Sciences, Querétaro 76130, CP, Mexico

Deadline for manuscript submissions: 15 September 2024 This Special Issue attempts to bring together significant contributions regarding the factors that contribute to the emergence, dissemination, management, and control of Antimicrobial resistance in these important bacterial groups. Contributions may include molecular mechanisms, clinical implications, and epidemiological dimensions of AMR.

We extend an invitation to researchers to contribute through research articles, reviews, short communications, and case reports.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in highquality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases. **Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
