Deadline for manuscript  
submissions:

**15 August 2024**

### Message from the Guest Editor

Dear Colleagues,

The world has witnessed a pandemic in this century in the form of the SARS CoV2 infection, which caused severe mortality across the world.

It is the right time to communicate the ongoing research on the evolving infections of viral, bacterial, or fungal origins. Recently, animals have also witnessed the emergence of infectious diseases such as the lumpy skin disease (LSD) outbreak in southern Asia. Keeping this in mind, we invite full-length articles and peer reviews for submission, covering the following topics:

1. Emerging hemorrhagic diseases of human and animals;
2. Neglected viral/bacterial/fungal infections;
3. Long COVID-19 complications post-recovery from SARS CoV2 infections;
4. Endemic or epidemic diseases of zoonotic importance;
5. Advanced vaccine developments for infectious diseases;
6. Antiviral/monoclonal antibody research;
7. Immunology of infectious diseases;
8. In vivo models to study the mechanisms of infectious diseases;
9. Development of advanced in vitro techniques to study infectious diseases.

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
