Message from the Guest Editors

Dear Colleagues,

Indoor environments can influence the health and wellbeing of patients, hospital personnel, students and workers. Airborne microorganisms are a major concern in indoor environments, being responsible for some nosocomial infections in patients and workers, along with other occupational diseases.

Aspergillus species have been found growing on air filters, insulation, cooling coils, ducts, and in protection devices. This contamination often leads to the onset of infectious, respiratory and allergic diseases. Some *Aspergillus* species can also produce mycotoxins as secondary metabolites produced in favourable conditions, and respiratory exposure to these toxins has been associated with acute toxicosis and cancer.

In this Special Issue, we look forward to receive your contributions in the form of original research or review articles that will update the different perspectives of *Aspergillus* sp. prevalence in different indoor environments. Reports of prevention and intervention actions to address this indoor problem as a threat to public and occupational health are also welcome.

Prof. Dr. Anita Q. Gomes

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
