

Vibrio Virulence

Guest Editor:

Dr. Tom Defoirdt

Center for Microbial Ecology and
Technology (CMET), Ghent
University, Ghent, Belgium

Deadline for manuscript
submissions:

31 January 2024

Message from the Guest Editor

This special issue aims to provide a collection of articles with recent insights into virulence factors, virulence genes, virulence regulatory mechanisms and/or the interference with these mechanisms in vibrios that are pathogenic to animals and/or humans. Studies focusing on symbiotic interactions between vibrios and a host will also be considered. We welcome the submission of research articles, review articles, and short communications related to various aspects of Vibrio-host interactions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
