Paulo, São Paulo, Brazil

Deadline for manuscript  
submissions:

**closed (15 April 2024)**

### Message from the Guest Editor

In the past few years, emerging and reemerging zoonotic infections have posed significant challenges to healthcare systems at a global scale. The recent COVID-19 pandemic illustrated the massive impact of a novel disease with zoonotic origin and respiratory human-to-human transmission. However, other zoonotic infections, including arboviral diseases, Influenza, Ebola, and several bacterial, protozoan, and parasitic conditions, have relentlessly affected human populations, particularly those living in more vulnerable conditions. In addition, contemporary environmental and behavioral aspects such as climate change, human mobility, and intensive animal farming influence the likelihood and potential risks associated with emerging and reemerging zoonotic infections. We are pleased to invite you to contribute manuscripts that advance the scientific knowledge on zoonotic infections and parasitic diseases. Research areas may include (but are not limited to) the following: basic, translational, clinical, and epidemiological studies addressing viral zoonotic infections; bacterial zoonotic infections; protozoan and parasitic zoonotic infections.

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
