

Biofilms and Microbiologically Influenced Corrosion: Recent Advances in Analysis, Detection and Mitigation

Guest Editor:

Dr. Laura L. Machuca

Curtin Corrosion Centre, WA
School of Mines: Minerals, Energy
and Chemical Engineering, Curtin
University, Kent Street, Bentley,
WA 6102, Australia

Deadline for manuscript
submissions:

closed (31 May 2023)

Message from the Guest Editor

This Special Issue welcomes contributions in the following areas:

1. Biofilm formation on materials (both metallic and non-metallic): attachment processes, biofilm properties, structure, composition, and interactions with the environment.
2. Biofilm research: analysis, methods and technologies.
3. Multispecies biofilms, interspecies relationships and their effects on corrosion.
4. Sensors and the early detection of biofilms.
5. Biofilm interactions with antimicrobials.
6. Innovative and eco-friendly approaches for biofilm inhibition.

an Open Access Journal by MDPI

Editor-in-Chief

Systems Biology, UFZ-Helmholtz
Centre for Environmental
Research, 04318 Leipzig,
Germany

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
