submissions:

closed (30 November 2022)

Message from the Guest Editors

Dear Colleagues,

The goal of this Special Issue is to focus on all minimally invasive protocols to reduce the incidence of acute and chronic inflammation, through the use of natural substances, such as probiotics, paraprobiotics, postbiotics, ozone therapy, laser therapy, the use of micro abrasive powders and minimally invasive instrumentation for the clinical and microbiological management of dental and periodontal tissues.

Clinical studies, in vitro investigations, reviews, case reports will be welcome, highlighting the proactive action for maintaining a constant ebiosis over time, reducing the pathogenic bacterial load.

Keywords: microbiome; microbiota; non surgical periodontal therapy; orthodontic; endodontic; peri-implant mucositis; peri-implantitis; minimally invasive instrumentation; prosthetic maintenance; oral medicine; enamel surface treatment; antibacterial activity

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
