Message from the Guest Editors

The aim of this Special Issue is to provide current and thoughtful scientific evidence of the potential uses of FMT to treat a broad spectrum of diseases.

We especially welcome interventional and observational studies aiming at improving the knowledge of FMT's effects on systemic health and oral health and of its use for the treatment of local and systemic diseases. Review studies including those that use conceptual frameworks for any of the aforementioned topics will also be welcomed.

Deadline for manuscript

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
