

One Health: Chlamydiae and Chlamydia-Likes in Humans, Animals and the Environment

Guest Editors:

Prof. Dr. Servaas A. Morré

Institute for Public Health Genomics (IPHG), Department of Genetics and Cell Biology, Research Institute GROW, Faculty of Health, Medicine & Life Sciences, University of Maastricht, 4-6, 6211 LK Maastricht, The Netherlands

Prof. Dr. Jonathan A Lal

Department of Molecular and Cellular Engineering, Jacob Institute of Biotechnology and Bioengineering, Sam Higginbottom University of Agriculture, Technology and Sciences, Prayagraj 211007, Uttar Pradesh, India

Deadline for manuscript submissions:

closed (15 March 2023)

Message from the Guest Editors

One health is the collaborative effort of multiple disciplines working locally, nationally and globally to attain optimal health for people, animals and the environment. The current Special Issue has a focus on Chlamydiae in the environment and in animals alone or preferentially in relation to human infection and disease. Knowledge of epidemiology and association with bacterial infections can potentially inform appropriate action as these bacterial infections are treatable, so novel case reports are also included in this Special Issue. Finally, since large consortia and projects on Chlamydiae and Chlamydia-likes are funded by the European Union and other continents, we encourage researchers and clinicians to prepare original articles describing the results obtained through the activities of these consortia.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
