Dr. Xinglong Zhao

State Key Laboratory for Fine Exploration and Intelligent Development of Coal Resources, China University of Mining & Technology, Xuzhou, China

Deadline for manuscript submissions:

closed (23 September 2022)

Message from the Guest Editors

This Special Issue aims to collect recent advances in the hydro-mechanical behavior of coal-rock fractures or fracture networks. We expect to bring together researchers in the aforementioned fields to highlight the current development of new techniques, to exchange the latest understanding of the underlying mechanisms, to present advanced algorithms for modeling, and to facilitate collaboration between researchers in different fields. We invite you to submit comprehensive review papers and original articles.

Potential topics include but are not limited to the following:

1. Theoretical modeling of fracturing in coal and rock mass;
2. Advanced techniques for monitoring or characterizing hydraulic fracture propagation;
3. Permeability evolution and multiphase fluid flow in fracturing coal-rock;
4. Novel laboratory testing approaches in the hydraulic fracturing of coal;
5. Field test of multistage hydraulic fracturing in the directional borehole;
6. Evaluation of fracturing effect in laboratory testing or field experiments.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
