

Microorganisms and Minerals in Natural and Engineered Environments

Guest Editors:

Dr. Anna Panyushkina

Laboratory of Chemolithotrophic Microorganisms, Russian Academy of Sciences, Leninsky Ave, 33, bld. 2, 119071 Moscow, Russia

Dr. Maxim Muravyov

Winogradsky Institute of Microbiology, Federal Research Centre “Fundamentals of Biotechnology” of the Russian Academy of Sciences, 119071 Moscow, Russia

Deadline for manuscript submissions:

closed (31 January 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on minerals and microorganisms from natural and engineered systems, such as acidic hot springs and soils, volcanic areas, mineral deposits, mining sites, and acid mine drainage. We invite you to share your recent studies on mineral processes and microorganisms involved in them, as well as microbe–mineral interactions. We also welcome contributions reporting on microbial diversity, metabolism, resistance, and stress response, which are of interest for basic and applied science, including, but not limited to, biohydrometallurgy, applied microbiology, and mineral chemistry. Studies of (bio)leaching and (bio)oxidation of sulfidic minerals are especially encouraged.

Dr. Anna Panyushkina

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
