Message from the Guest Editors

Dear Colleagues,

The Special Issue “Dust (Urban and Industrial) Medical Mineralogy and Geochemistry” provides wide coverage of the general areas relating to dusts, with natural and anthropogenic sources, as well as their impact on human health. Published papers deal with dust composition, size, morphology, experimental and theoretical methods to identify sources, health-related outcomes, among others. The full experimental details must be provided so that the results can be reproduced.

Deadline for manuscript
submissions:

closed (17 February 2023)

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
