Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editors

Dear Colleagues,

In recent years, industrial wastes have been attracting scientific interest, as they can potentially be viable sources of valuable raw materials. Advanced techniques, innovative processes, and novel methods must be developed and synergically implemented to increase resilience and efficiency in the supply of raw materials from secondary sources, at the same time reducing the impacts on the environment, favouring the competitiveness of the industrial sector.

This Special Issue aims to provide comprehensive research on the recent advances and needs in the management, recycling, and reuse of industrial wastes (including mining wastes) to create a resource-efficient and competitive economy that transforms environmental problems into opportunities. Therefore, new research outcomes concerning industrial waste characterization and sustainable management, the recovery of secondary and critical raw materials through advanced technologies (also biologically mediated) and multidisciplinary approaches, and economic and environmental assessments of resource recovery are particularly welcome, as well as discussions of case studies.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
