Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

Metal nanoparticles (MNPs) are the leading class of nanoparticles, which is attributed to their unique features and widespread applications. Metal nanoparticles have been investigated with interest because they exhibit outstanding physical, chemical, and biological properties. This Special Issue focuses on “Metal Nanoparticles: Synthesis, Characterization, and Application”. This Special Issue aims to offer a forum for the prompt publication of original and high-quality research with an emphasis on the synthesis, assembly, and characterization of novel metal nanoparticles and their potential chemical applications.

We warmly welcome the submission of original research papers and reviews.

Prof. Dr. Bhanu P. S. Chauhan

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
