

Metal-Based Drugs: Bioinorganic Chemistry and Modes of Action— Dedicated to the Research Activity of Professor Luigi Messori

Guest Editors:

Prof. Dr. Chiara Gabbiani

Department of Chemistry and
Industrial Chemistry, University
of Pisa, Via Giuseppe Moruzzi 13,
56124 Pisa, Italy

Dr. Alessandro Pratesi

Department of Chemistry and
Industrial Chemistry, University
of Pisa, Via Giuseppe Moruzzi, 13,
56124 Pisa, Italy

Dr. Tiziano Marzo

Department of Pharmacy,
University of Pisa, Pisa, Italy

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editors

Dear Colleague,

this Special Issue dedicated to the career of Prof. Luigi Messori, we are glad to invite our valuable colleagues to submit their manuscripts relating to the range of topics covered during Luigi's scientific career, as summarized in the following topics:

- Anticancer gold drugs. Synthesis, characterization and biological evaluation;
- NAMI A, KP1339 and related ruthenium compounds;
- Interaction studies between metal-based drugs and biomolecules (e.g., proteins, DNA, oligos);
- Mass spectrometry and X-ray diffraction analysis of metal–protein adducts;
- Mechanistic studies of metal-based drugs through omics technologies, in particular proteomics;
- Metalation of biologically relevant target proteins characterized by advanced mass spectrometry tools.

We invite you to visit the **website**, submit the tentative **abstract**, and submit your full **manuscript**. Any questions or suggestions, please feel free to contact the managing editor Larry Li (larry.li@mdpi.com).

an Open Access Journal by MDPI

Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
