Message from the Guest Editors

Dear Colleagues,

For this issue of *Molecules*, we are interested in high-quality publications (e.g., research, reviews) covering all aspects of nano-based delivery systems for the treatment of different diseases. There are numerous drug delivery systems focused on the designing of novel delivery systems with the main focus on their application to disease conditions. Conventional delivery systems have many challenges such as side effects, high dosing and toxicity. The entrapment of drugs in the nanodelivery systems offers numerous advantages of increased solubility, targeted delivery, imaging, lesser toxicity and enhanced therapeutic efficacy. This Special Issue also covers the research/reviews addressing the delivery systems that present other relevant contributions to the field of nanomedicines.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
