Message from the Guest Editors

Herbal medicine traditionally focuses on the use of herbal plants and plant extracts to treat a diverse of human diseases, in fact, a number of modern drugs were originally extracted from plant sources, even if they are now made synthetically. In Ayurveda, about 2000 plant species are considered to have medicinal application, while the Chinese Pharmacopoeia lists over 5700 traditional medicines, mostly of plant origin. Many of the diverse plant species growing throughout the world have medicinal uses, containing active constituents that have direct beneficial effects on the human body.

In this Special Issue, we are requesting original research articles and reviews focusing on the identification, synthesis, and evaluation of herbal medicine and/or active constituents against viral infections. Studies using antiviral therapeutic approaches and rationales based on herbal medicine are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
