### Message from the Guest Editors

Natural products have been known to be an important source for drug discovery. Natural product scientists explore different environments and ecosystems in order to discover unique bioactive structures. This Special Issue of *Molecules* publishes work from scientists in Asian countries, as well as contributions from other countries concerning natural products of Asia and introduces information on the molecular mechanisms of health promotion, the therapeutic effects of natural products and their extracts, original basic studies regarding the chemical, biological and pharmacological activities of small molecules obtained from natural products and new extracts of natural products.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
