### Message from the Guest Editors

Dear Colleague,

This Special Issue will honor Prof. Dr. K. Hüsnü Can Başer for his outstanding contributions in the fields of pharmacognosy, phytochemistry, botany, and ethnopharmacology. In this Special Issue, we aim to collect original research articles and review articles in the following topics but not limited:

1. Isolation and structure elucidation of bioactive compounds;
2. Development of new methods for structure elucidation;
3. Biotransformation of biosynthetically interesting compounds;
4. Bioactivity studies on natural products;
5. Natural volatiles and essential oils.

You are welcome to visit the [Website](#) and submit your tentative [Abstract](#). We look forward to receiving your contribution to the Theme Issue.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
