# **Chemistry and Pharmacology of Modulators of Oxidative Stress 2018**

Guest Editors:

#### Prof. Dr. Luciano Saso

Faculty of Pharmacy and Medicine, Sapienza University of Rome, 00185 Rome, Italy

#### Prof. Dr. Neda Mimica-Dukić

Biochemistry and Environmental Protection, Department of Chemistry, University of Novi Sad, Trg Dositeja Obradovića 3, 21000 Novi Sad, Serbia

### **Prof. Dr. Ryszard Amarowicz**

Institute of Animal Reproduction and Food Research, Polish Academy of Sciences, 10-748 Olsztyn, Poland

Deadline for manuscript submissions:

closed (28 February 2019)

# **Message from the Guest Editors**

Dear Colleagues,

As we all know, oxidative stress (OS) is involved to many pathologies, ranging from cancer to neurodegenerative diseases, and modulators of OS can be of therapeutic value in some of them, acting by different mechanisms, such as scavenging and metal chelating effects, mimicking the antioxidant enzymes or upregulation of their expression, activating the nuclear factor erythroid 2-related factor 2 (Nrf2), inhibiting pro-oxidant enzymes, etc.

This Special Issue aims to provide a forum for the dissemination of the latest information on new methods for extraction, isolation, synthesis, or derivatization of modulators of OS stress, and on in vitro and in vivo testing of their biological activities in view of possible pharmacological

Prof. Dr. Luciano SASO

# **Message from the Editor-in-Chief**

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous*))
