Message from the Guest Editor

Dear Colleagues,

The analysis of biological compounds in biological samples such as blood plasma, urine, and tissue is essential to clarify biological phenomena. The analysis of drug and its metabolites after *in-vivo* administration is also important. Separation is considered one of the most important analytical methods. Chromatographic methods, especially HPLC, appear to be the most common, because the techniques allow for the separation of a quite complicated mixtures of analytes.

In this Special Issue, the contribution of original research and review articles regarding separation techniques using liquid chromatography, which is applied to biological fluids, are welcome.

Dr. Makoto Tsunoda

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
