# **Biological Activities of Traditional Medicinal Plants**

Guest Editors:

#### Dr. Maria Fernanda Taviano

Department of Chemical, Biological, Pharmaceutical and Environmental Sciences, University of Messina, Messina, Italy

#### Dr. Rosaria Acquaviva

Department of Drug and Health Sciences, Biochemistry Section, University of Catania, Catania, Italy

#### Dr. Giuseppe Antonio Malfa

Department of Drug and Health Sciences, University of Catania, 95125 Catania, Italy

Deadline for manuscript submissions: closed (31 July 2023)

### Message from the Guest Editors

Numerous products derived from traditional medicinal plants have proven to be a source of biologically active compounds, many of which have been the basis for the discovery of new lead chemicals for drug development. However, despite intense efforts, such information is incomplete or unavailable for many species. Documented ethnobotanical uses still lack scientific validation for several traditional medicinal plants, and many therapeutic properties have yet to be demonstrated.

This Special Issue aims to collect the latest findings and advances in traditional medicinal plant research, including studies on wild edible species, and their current and potential future applications for pharmaceutical, nutraceutical or cosmetic purposes. Contributions focusing on extraction procedures, chemical characterization and evaluation of the biological properties of extracts, fractions and isolated compounds will be considered. Results showing the relationship between chemical composition and biological activity of phytocomplexes and/or isolated compounds are particularly welcome.

### **Editor-in-Chief**

### Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
