Message from the Guest Editor

Dear Colleagues,

As the Guest Editor of a Special Issue of *Molecules* on "Coordination Polymers: Synthesis, Structure, Luminescence and/or Magnetic Properties", it is my pleasure to invite you to submit an article on this topic. This Issue is devoted to the design of new coordination polymers (including porous compounds), the study of metal- or ligand-centered luminescence and/or magnetic properties, as well as the influence of different substrates on their absorption. The article may be either a full paper or a communication based on your own research in this broad area of coordination chemistry, or may be a focused review article on some aspect of the subject. All submissions will be subject to peer review.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
