Message from the Guest Editors

Dear Colleagues,

It is with great pleasure that we announce the new Special Issue of *Molecules*, entitled “Molecules for Biotechnologies”. This Special Issue welcomes original papers and comprehensive reviews focused, but not limited, to the design, synthesis and biochemical characterization of molecules involved in biotechnological applications, such as the development of novel approaches for molecular diagnostics and biocatalysis, the obtainment of new biomaterials and drug delivery systems, the clarification of systems biology pathways or even the gene regulation. Please refer to the list of keywords for further topics.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
