Message from the Guest Editors

This Special Issue is dedicated to Prof. Madalena Pinto (<http://www.madalenapinto.com>), who is currently Full Professor at the Department of Chemistry, Faculty of Pharmacy at the University of Porto (FFUP), on the occasion of her 70th birthday (to be celebrated on 15 September, 2018), and in honor of her many achievements in Medicinal Chemistry, and, particularly, her outstanding research contributions in the fields concerning “Xanthoness”.

Xanthoness are a class of oxygenated heterocyclic compounds with a dibenzo- γ -pyrone scaffold which have long been recognized for their wide range of biological and pharmacological activities.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
