Message from the Guest Editors

Dear Colleagues,

Protein folding is a fundamental theme in molecular biology. Elucidation of the molecular mechanisms of this process has challenged molecular biologists for over half a century. Although computational methods have now achieved remarkable success in the prediction of native structures, the fundamental principles of the protein folding process have yet to be fully elucidated. In addition, we still have an incomplete understanding of the components of the protein homeostasis system, which controls protein folding in the cellular environment. Furthermore, failures in protein folding may lead to misfolding and aggregation, a phenomenon closely related to a wide range of human disorders, including Alzheimer's and Parkinson's diseases and type II diabetes. This Special Issue is dedicated to the memory of the late Professor Sir Christopher M. Dobson, who made outstanding contributions to the advancement of studies of protein folding and the related areas and played an irreplaceable role in the promotion of protein science.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
