Energy, Ming Chi University of  
Technology, New Taipei City,  
Taiwan

Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### Message from the Guest Editor

Recent technological innovations have increased the widespread application of various energy storage/conversion and catalysis fields. Rational design and synthesis of state-of-the-art nanomaterials are significant for achieving desired material properties for a variety of applications mentioned above. With this Special Issue, we aim to collect recent research studies developed in the scientific community of Asia, related to new nanomaterials applied to energy storage/conversion and/or as electrocatalytic materials.

All related studies are suitable to submit to this Special Issue if they have been mainly carried out in Asia or by Asian researchers. Any international collaborative research with Asian researchers is also welcome. Another aim of this Special Issue, apart from introducing state-of-the-art research on the topic “Nanomaterials for Energy Storage/Conversion and Electrocatalysis in Asia”, will be to promote collaborative investigations among international researchers in the Asian area.

## Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [Inspecc](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Physics, Applied*) / CiteScore - Q1 (*General Chemical Engineering*)
