## Nutritional Supplements for Bone Health

Guest Editor:

**Dr. Yan Wen**

Key Laboratory of Trace Elements and Endemic Diseases of National Health Commission, Collaborative Innovation Center of Endemic Disease and Health Promotion for Silk Road Region, School of Public Health, Health Science Center, Xi'an Jiaotong University, Xi'an 710061, China

Deadline for manuscript submissions:

**5 October 2024**

### Message from the Guest Editor

Dear Colleagues,

Bone health is of great importance to our daily activities and is maintained using multiple nutrients under a complicated regulatory system. Nutritional supplements are developed and utilized to keep and improve our bone health under pathological status or during specific life stages. In this context, there are many issues to address. Numerous studies have focused on this topic to help improve the supplement usage strategy. We organized this Special Issue aiming to collect and spread the most current and valuable data on this topic, which we believe will eventually boost the general bone health of the public.

We are enthusiastic about your original research, no matter whether it is population-based or animal-based, in vivo or in vitro, and clinical or basic. Meanwhile, we also welcome meta-analyses and reviews in which up-to-date summaries and informative results are provided. Any other opinions from experts on this topic are more than welcome.
