submissions:

5 August 2024

Message from the Guest Editors

Dear Colleagues,

In recent years, a growing number of people are dealing with eating disorders in their various, diversified, and complex forms, including anorexia nervosa, binge eating disorders, and overweight and obesity. Moreover, eating disorders and obesity have assumed the entity of a real social and economic emergency due to medical complications and associated psychiatric comorbidities. Of note, eating disorders are nowadays among the deadliest mental illnesses worldwide.

This Special Issue entitled “Compulsive Eating, Anorexia Nervosa and Obesity: From Prevention to Treatment” welcomes original research papers and up-to-date reviews (including systematic reviews and meta-analyses), ranging from preclinical to human studies, designed to explore potential neurobiological mechanisms as well as preventive interventions and behavioral or pharmacological treatments. We invite authors to submit their works and contribute to this research topic of clinically relevant considerable value.
