Food Allergy and Clinical Immunology

Guest Editors:

Prof. Dr. Maria Leite-de-Moraes

Laboratory of Immunoregulation and Immunopathology, INEM (Institut Necker-Enfants Malades), CNRS UMR8253 and Inserm UMR1151, Paris, France

Dr. Karine Adel-Patient

Service de Pharmacologie et d'Immunoanalyse, Département Médicaments et Technologies pour la Santé (DMTS), CEA, INRAE, Université Paris-Saclay, SPI, 91191, Gif-sur-Yvette, France

Deadline for manuscript submissions: closed (25 March 2022)

Message from the Guest Editors

Dear Colleagues,

Food allergy is a common immune disorder that has increased in prevalence over the last two to three decades. In Western countries, up to 10% of children and 4% of adults are affected. The majority of patients are allergic to milk, egg, peanuts, tree nuts, fish, or shellfish. Food allergic reactions are responsible for a variety of symptoms and disorders involving the skin and gastrointestinal and respiratory tracts. IgE-mediated and non-IgE-mediated (cellular) mechanisms, as well as eosinophils, mast cells, ILCs (innate lymphoid cells) and Th2 cells, have emerged as key factors associated with food allergic disorders such as eosinophilic esophagitis, food-protein-induced enterocolitis syndrome (FPIES), or food-protein-induced proctocolitis. The field of therapeutics is advancing rapidly. Despite these major advances, a full understanding of the immune mechanisms involved in distinct phenotypes and endotypes of food allergy is still required to propose a "personalized medicine" approach for the treatment of this pathology.

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition & Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
